

TESLA STOCK PRICE

1. This dataset is about Tesla stock price by year.
It has attributes

- The opening price of the stock - "Open"
- The high price of that year- "High"
- The low price of that year- "Low"

It gives complete information about Tesla stock price.

2. As there is enormous amount of data the bar graph summarizes the data for easy visual understanding.

Each data category is represented by its frequency distribution.

It explains the data's pattern more clearly than the table does.

It aids in quickly estimating the important numbers.

We can make line chart with it also, but bar chart gives more detail about data more precisely

3. I have added colour to differentiate colours and added animation for the best visual effect.
Added coloured bar chart for different attributes mentioned
